**Figures Never Lie, but Liars Figure: Vote NO on Prop B.
(www.PropBNo.com)**

DWP, "pie in the sky" assumptions notwithstanding, admits that the price of solar power will be 3 to 4 times the current rate. That's not "significantly cheaper."

City Hall is quietly considering unfreezing the Energy Cost Adjustment Factor to pass along these significantly higher costs.

Why is City Hall excluding other trade union workers? Is it because they are more efficient as was the case with the water trunk lines?

Why is DWP stonewalling LAUSD, its largest customer and owner of acres of rooftops, if it will save money that will benefit the students?

Why? For millions in campaign contributions, City Hall, by manipulating your vote, will grant DWP a sole source, no bid contract costing Ratepayers several hundred million dollars more than the already high cost for Solar Power!

For Clean Government, Vote NO. To save millions, Vote NO. Thank you.
